Product data sheet

Filter pressure reducing valve MS6-LFR

All gas source processing functions: pressure control, opening, filter control, and soft start valves with safety functions, filters, pressure and flow sensors, dryers, water separators, sensors, oil mist eliminators, and gas separation blocks. Each application has a suitable solution, with specifications 4, 6, 9, and 12 to choose from.

Module width 62 mm

Direct acting diaphragm control valve

Good control characteristics, small pressure hysteresis, and initial pressure compensation

Good particle and condensate separation effect

With or without secondary exhaust

High traffic

Lockable rotary handle

Integrated reflux option for exhaust from output 2 to input 1
