

Rodless cylinder DGC-K-32- 475-PPV- A-GK-FK1312502

URL:<https://www.sxplc.com/rodless-cylinder-dgc-k-32-475-ppv-a-gk-fk1312502>

Product data sheet

Structural features: rodless cylinder

Inertia compensator principle slotted cylinder, mechanical coupling

Basic type of guide rail

Working mode dual action 8500

Air interface M5 G1/8

Buffer form a Page 1

DGC -... - P both ends are not adjustable

DGC -... - PPV - Adjustable at both ends

DGC -... - YSR... Self adjustment at both ends

Buffer length, with buffering form PPV [mm] 17.5

Maximum speed [m/s] 3

Position sensing through proximity switches

Installation method: Profile installation parts

Foot frame mounting parts

Direct installation

Install at any location

Working medium compressed air, in accordance with ISO 8573-1:2010 [7: -: -]

Precautions for working/leading media: Lubricating working media can be used (lubricating working media must always be used in the future)
