

Fan R2D225-AV02-15

URL: <https://www.sxplc.com/fan-r2d225-av02-15>

Product data sheet

Weight: 2.3 kg

Structural size: 225 mm

Motor structure size: 68

Rotor surface: unpainted

Wind turbine material: PA plastic

Number of blades: 7

Rotation direction: Right side view of rotor

Protection type: IP44; Depending on installation and location

Insulation level: "B"

Moisture proof level ()/Environmental protection level (H): F1-1; H0+

Installation location: Any

Condensed water hole: None

Operating mode: S1

Motor bearing structure: ball bearing

Contact current according to IEC 60990 (measurement circuit diagram 4, TN system):<0.75 mA

Motor protection device: The thermal overload protector (TW) is running and the foundation is insulated

Cable specifications: Side

Protection level: I (when the user has connected the ground wire)
