

Actuator IC 50-30Q20E

URL: <https://www.sxplc.com/actuator-ic-50-30q20e>

Product data sheet

- | |
|----------------------------------------------------------------------------------|
| • Running time: 30 seconds/90° |
| • Mains voltage: 120 V AC 50/60 Hz |
| • Torque: 20Nm |
| • Controlled by continuous signal |
| • Easy to switch between Automatic and Manual mode |
| • Display of valve position |
| • Selectable direction of rotation |
| • Adjustable motor behaviour in the event of cable discontinuity |
| • Actuator can be mounted directly onto the butterfly valves DKR |
