

Circuit breaker MCL169S

URL: <https://www.sxplc.com/circuit-breakermcl169s>

Product data sheet

Advanced rotating double break point contact system and current limiting structure

The maximum segmented capacity can reach $I_{cu}=I_{cs}=150\text{kA}$, and the upper and lower incoming lines do not reduce capacity

A full range of thermal magnetic and electronic molded case circuit breakers, with on-site adjustable protection parameters

Internal accessories are universal, AC and DC are universal

The circuit breaker is in the closed position. When the panel is opened, the circuit breaker will automatically trip immediately

Fault trip indication window for more efficient, accurate, and simple operation and maintenance
