## **Relief valve AR925-N20G**

URL:https://www.sxplc.com/relief-valve-ar925-n20g

## **Product data sheet**

Valve standard national standard
Morphology: Spherical
Drive mode: Pneumatic
Structural form: unidirectional
Mode of action Double acting
Type (channel location) Two-way type
Function: Stress reducing
Lining material: Rubber
Sealing material: Rubber

1/2

Sealing method: Soft seal

Pressure Environment: Atmospheric pressure

Temperature: Room temperature

Flow direction: unidirectional

Can be equipped with accessory springs

Applicable Industries Electricity

Applicable medium: Air
