

## Front armor plate E4083R55

URL:https://www.sxplc.com/front-armor-plate-e4083r55

## **Product data sheet**

The slurry pump quard plate is an important part of the slurry pump, ike the sheath and the impeller, they are all part of the slurry pumpfow-through. When the slury pump is running, the guard plate is in direct contact with the slurry. The main function of the guard plate is to the sheath cooperates to form a semiclosed fow channel, so that the slurry runs in this space, since the quard plate is parael to therunning direction of the slurry, the service life of the quard plate is longer than that of the sheath and the impeller.
